Hiindsight is PLM and Digital Manufacturing service partners. We will work with you to understand your current business processes and benchmark with industry best practices. This Business Process Analysis will help you to identify your strengths and challenges. These identified challenges will be foundation for us to define an innovative PLM and DM strategy to gain competitive edge in market.

Our implementation team brings years of experience in PLM and DM domains covering Aerospace & Defense, Automotive, Heavy Machinery, Shipbuilding and Energy verticals. Our Project Management Methodology is a combination of Waterfall and Agile models helping you to reduce risk and enhance continuous improvement in your PLM initiative.

Hiindsight is specialized in delivering innovative and optimal PLM solution for your future business processes. We at Hiindsight will help you from Engineering Process Management involving Managing Bill of Materials (BOM), Configuration Management, and Change Management. Extending this to Manufacturing Process Management we create optimal Process Plan (BoP) involving Routing and Time Management. We are also specialists in Simulation systems to validate your process plan in 3D environment before implementing in Shopfloor to reduce rework and improve your productivity.

This end-to-end PLM and DM solution and interfacing with MES and ERP systems will help you build a World-class Manufacturing Environment.

PLM Services

BUSINESS PROCESS ANALYSIS

- Review Current Process
- Gap Analysis
- PLM Strategy & Roadmap
- PLM Business Model

PLM IMPLEMENTATION

- Program Management
- Data Management
- Digital Manufacturing
- Simulation / 3D Validation
- 3D PDF Work Instructions

SYSTEMS MIGRATION

- Legacy Systems Migration
- Data Migration
- System Upgrade

SYSTEMS INTEGRATION

- CAD Integration
- PDM/PLM Integration
- PLM – MES – ERP

KNOWLEDGE MANAGEMENT

- Workshops
- Seminars / Webinars
- Customer Specific Trainings

SYSTEMS MANAGEMENT

- System Administration
- Production Support
- Future Enhancements

DISCOVER

We start by analyzing your business processes and benchmark against industry standards and your business objectives.

Our deliverables will include the **current process map, gap analysis** to identify gaps.

DESIGN

We work with you to re-design an innovative & optimized TO BE process to improve your productivity.

Our deliverables will include the **TO BE Process map** with supporting **Live Demo** and **5 year ROI** calculations.

DEPLOY

We will take full responsibility to deploy both DEV and Prod systems and Test them with your team members.

Our deliverables will include **running DEV and Prod systems** with verified test cases by your team members.

DEFINE

We next create a PLM Strategy and Roadmap in-line with your organization objectives.

Our Deliverables will include **identifying the right PLM tool** and building **PLM and DM strategy** in-line with your bottom line targets.

DEVELOP

In this phase we customize & configure the PLM and DM systems for your Organization Specific Process.

Our Deliverables will include your **business processes and data mapped into PLM and DM system**.

DELIVER TRAINING

We will deliver **Customer Specific Training** and future support to all your team members involved.

Our Deliverables will include 3-5 day training with supporting Training Manuals and Movies.
